We are proud to report that eight of our students, including two high school interns, had their papers accepted to SPIE Medical Imaging 2019, one of the largest international conferences of the field, to be held in Diego, California, USA on February 16 - 21, 2019. SPIE will also publish the 10-page papers in an indexed digital archive. The list of authors and their papers is as follows:

Undergraduates
Step onto the World Stage

1. **Jacob Laframboise** (High School)
   - Reproducibility of freehand calibrations for ultrasound-guided needle navigation.

2. **Sydney Perrin** (High School)
   - Analyzing the curvature of the colon in different patient positions.

3. **Julia Wiercigroch** (1st Year)
   - Validation of a low-cost adjustable, hand-held needle guide for spine interventions.

4. **Laura Connolly** (2nd Year)
   - Mechanically-controlled spectroscopic imaging for tissue classification.

5. **Mark Asselin** (3rd Year)
   - Navigated real-time molecular analysis in the operating theatre, demonstration of concept.

6. **Shaun Lund** (2nd Year)
   - Controlling virtual views in navigated breast conserving surgery.

7. **Saleh Choueib** (3rd Year)
   - Electromagnetically tracked partial nephrectomy navigation: demonstration of concept.

8. **Hillary Lia** (3rd Year)
   - Analyzing the curvature of the colon in different patient positions.
